Subject: GIS File Request for D/F data

Todd – As discussed on yesterday's call, LWG is requesting the following GIS files related to the D/F analysis.

We need – for the 5 D/F congeners and Total D/F – the following:

- Surface sediment concentration sample results (these can be point feature classes or a table with XY coordinates)
- Natural neighbors rasters
- Mapped RAL polygon feature classes for each of the alternatives B-G

Also just a reminder, we also have requested the Total PAH natural neighbor raster.

Thanks!

Amanda Shellenberger, P.E.
